For Crop Week Ending Sunday, March 16, 2008

Released March 17, 2008

Volume 08 Number 02

CROP INFORMATION

Days suitable for fieldwork: 2.9

Soil moisture supplies: 1% short, 50% adequate and 49% surplus

Field Crops Report

Wet conditions remained across the state last week. Most field work was slow due to the wet conditions. Some producers were able to begin planting corn and rice, but in general corn planting has gotten off to a slow start due to the wet conditions; progress was 41 points behind last year. Rice planting was in-line with last year's and the five-year average. Sugarcane producers continued destroying old stubble and applying herbicides to fields.

Fruits, Vegetables and Specialty Crops

Producers continued spraying and harvesting their strawberry fields. Vegetable producers continued preparing for planting of spring crops and selling cole crops. Crawfish producers were reporting a better quality of crawfish being caught.

Livestock, Pasture and Range Report

Calving continued last week. Cattlemen were fertilizing and spraying pastures. The cool temperatures and wet conditions have allowed pastures to remain in good to fair condition.
